

WHAT'S NEW AT ABCF?

Share Your Love by Spreading Awareness

Celebrate the month of love by spreading awareness about the importance of early breast cancer detection. The American Breast Cancer Foundation's core mission is to provide reduced-cost or free testing to those who can't afford it. This is critical because when breast cancer is detected early, and is in the localized stage, the 5-year relative survival rate is 99%.

Start by staying on top of your own health by conducting self-breast exams and scheduling your annual mammogram

appointment. Encourage family and friends to do the same. Additionally, please consider extending your love by joining ABCF as a volunteer, donor, or awareness advocate.

Make an Immediate Impact through ABCF

Imagine feeling a lump in your breast and not having the money for testing. Thousands of people face this challenge each year. The anxiety is overwhelming and not following up can be life threatening.

Thanks to supporters like you, ABCF helps by providing reduced-cost or free diagnostic testing quickly.

Our **Breast Cancer Assistance Program** supports individuals by paying medical providers directly for their testing.

Our **Community Partnership Program** awards grants to medical clinics throughout the country, enabling them to provide testing when they encounter patients in need.

Please support these life-saving programs by giving today.

See How Your Support Saves Lives

ABCF has provided more than 47,000 Community Partnership Program grants to date. Moffitt Cancer Center has been a decade-long community partner, utilizing our grants to provide direct testing to individuals in need.

Together, we're saving lives!

"With generous funding from the American Breast Cancer Foundation, we are able to provide free screening and diagnostic mammograms and ultrasounds to over 130 women in our most underserved communities each year."

Amanda Hollis, Moffitt Cancer Center
